Re: DEQ Agreement #143-20, IGA for old Newberg Landfill

The Yamhill County Solid Waste Department is requesting a review and approval of an IGA presented by Oregon State Department of Environmental Quality (DEQ) for the old Newberg Landfill.

As approved by B.O. 19-365, a grant application was submitted to DEQ for the installation of 6 gas monitoring wells on the old Newberg Landfill for an amount of \$23,609.00. DEQ reviewed our grant application and created IGA- Agreement #143-20.

IGA- Agreement #143-20 is for the installation of 8 gas monitoring wells (DEQ felt the 6 requested in the original grant was not enough and raise the number of gas monitoring wells to 8) and for corrective action for a leachate seep for a total of \$75,459.00-\$95,459.00 at the old Newberg Landfill. The grant DEQ awarded Yamhill County Solid Waste will cover up to an amount of \$100,000.00 for the activities listed in Agreement #143-20.

Yamhill County will act as the contractor and will subcontract the well drilling and other aspects of the agreement. Invoices will be submitted to DEQ for reimbursement.

Thank you,

Ashley Watkins
Solid Waste Coordinator
